The Finest from our Pastures...

Atlas Livestock Marketing Welcomes You!

Welcome to the 13th Annual Western Harvest Simmental Female Sale, held at the Skywest Simmentals sale facility just southwest of Didsbury.

It is with a great deal of excitement that we welcome you to this year's Western Harvest Sale and begin a new chapter alongside this exceptional group of breeders with Atlas Livestock Marketing.

Cody Coupland
Tel: 403-877-0799

Over the past 13 years, Western Harvest has built a reputation that reaches far beyond Western Canada. It has become one of the premier sources for elite Fleckvieh genetics in North America, drawing interest from breeders across Canada, the United States and internationally. That reputation hasn't happened by accident. It has been built through years of commitment from a group of breeders who continue to dig deep into their programs and bring cattle to town that represent the very best they have to offer.

This year, we're very pleased to welcome Levi Marcinek of Cowboss Simmental to the Western Harvest group. Levi's enthusiasm for the Simmental breed and commitment to producing quality cattle make Cowboss Simmental a great fit alongside this highly respected group of consignors. We're excited to have Levi involved and look forward to what Cowboss Simmental will bring to Western Harvest for years to come.

Glenn Norton
Tel: 780-542-0634

The 2026 offering is the largest Western Harvest has assembled to date, and what may be even more impressive is the depth of quality that has been maintained from beginning to end. This group has never been about simply putting numbers in the catalogue. Year after year, these breeders have been willing to open up their replacement pens and cow herds and offer genetics they truly believe can move programs forward.

As you study this year's offering, you'll find females backed by generations of proven cow families, progressive breeding decisions and programs that have placed a tremendous amount of emphasis on productivity, functionality and longevity. These are the kind of cattle this group has built its reputation around, and the kind of females we believe can go on to make a lasting impact for their new owners.

Darren Paget
Tel: 403-323-3985

Whether you're searching for a future donor, your next foundation female, a female carrying an exciting service, or an opportunity to add proven genetics to your program, we believe there is something here for everyone. The depth and diversity of this offering are a true reflection of the programs behind it.

One of the best parts of working in this industry is working alongside good cattle people who are passionate about what they do. Western Harvest is exactly that—a tremendous group of breeders, great cattle and an atmosphere that has made this sale a destination each November. We are extremely proud to work alongside this group and look forward to carrying that tradition forward.

We invite you to join us in Didsbury on November 14th for the 13th Annual Western Harvest Sale. Come early, tour through what we believe is an outstanding set of Fleckvieh females, visit with the breeders and stay late to enjoy the hospitality Western Harvest has become known for.

Jayden Warren
Tel: 403-307-4330

If you're unable to attend in person, please don't hesitate to reach out to any member of the Atlas Livestock Marketing team. We would be happy to visit with you about the offering, discuss which females may best fit your program and represent your interests on sale day.

We look forward to seeing you in Didsbury on November 14th!

Cody Coupland

*The Western Harvest Contributors
would like to thank all of their buyers and bidders through the years.
Your support is greatly appreciated!*

From our Pastures...

Welcome from Skywest Simmentals

On behalf of everyone here at Skywest Simmentals and the entire Edwards family, we would like to welcome all cattlemen and women to our farm for the annual Western Harvest Sale. With last year being the inaugural sale since being moved to our new sale facility, the response and support by the entire industry was tremendous. The stands and building were packed with eager buyers and bidders, the excitement was through the roof and the atmosphere was electric with record prices and bred heifers finding new homes right across Canada- into the US and even Australia got in on the action!

We would like to extend a special thank you to our long-term customers for the trust and support you've shown us over the years. Your success is the best measure of our program, and we are grateful to be part of your operations. We also want to welcome those joining us for the first time, we appreciate the opportunity to earn your confidence and business.

This year we would like to thank Atlas Livestock Marketing, Cody Coupland and his entire team for taking on the duties of sale management. It's a tough job and we appreciate the hard work that goes into the buying and selling of cattle, not just on sale day but throughout the year. We would also like to say a huge Thank you to Jay Good and the Transcon Livestock team for the many years of professional sales management. We appreciate the impact that you have had on our program and helped build our herd to what it is today

All heifers will have videos available to view a couple weeks before the sale day. If you have any questions or would like to tour the females prior to sale time, give one of us a call.

Sincerely,
The Edwards Family

							78.3

- A Synergy daughter with a soft loose made build and smooth polled skull.
- Its heifers like this that will carry on the legacy of Synergy in Canada for years to come due to all the reasons that has made him great. Great footed, excellent udders, correct bone structure, big hiped with smooth front ends.
- The dam of Sassy 554N is an exciting young cow from Virginia Ranch that has exceeded our expectations like the rest of the herd from Harry and Michelle. She has a daughter working at Double B Farms and one retained here in our herd. Not sure why this one is in the sale, I'm sure we will regret selling her.

Exposed to Crossroads Titan March 18 to April 8 and Clearwater Tate April 9 to May 21.
Observed bred March 18.

- A power female that is large statured, long spined and big muscled while having that soft soggy look. Some of these heifers just have that broody cow look at a young age and carry it on right into their prime. Here is a prime example.
- The Synergy / Marquee combination could be a homerun here with excellent udder structure on both sides that should lock in the trait here.
- Loads of maternal strength built into Mykena 548N with Marquee, Notorious, Radison, Imax, Spartacus.

102 lbs	674 lbs	3.0	5.8	69.5	92.1	32.7	3.2	67.5	

- Joyce and her pen mates will be the last group of naturally bred Synergy heifers offered in Canada as Synergy was sold to Ruby Lane Farms, Texas and Stanley Martin, Iowa shortly after our breeding season 2 years ago. The impact that Synergy has had on the breed is unmeasurable over the years. The Synergy heifers have averaged over \$20,000 every year in the sale ring.
- Its heifers like Joyce that have gone on and done so well for their new owners. Their quiet disposition, smooth made and visually attractive.
- The dam of Joyce has quickly become one of the best producing cows that was in the group of females we had selected out of the Mark Land & Cattle herd a few years ago.

82 lbs	815 lbs	8.6	3.0	66.1	90.6	39.5	6.5	72.2	

- Here is well built, moderate framed heifer off of Synergy that will have an excellent udder which is common in these genetics. Small teats with perfect placement.
- With Merlot 535N being a little more moderate compared to some of her big broody pen mates, don't let that make you look away as her dam is one of the highest producing females in the herd. She has one of the top Milsap bull calves in our entire pen this year so be sure to check him out in the nearby pen during the harvest sale and you will see what this cow family can do. Could be a sleeper here with a very high ROI.
- This heifer is stacked with pedigree of Sibelle Spartacus 8A, Crocus 20D, Adonis 96Z, Radium, Imax. The list goes on and on.

4
SW

Exposed to Skywest Herzog March 18 to April 3 and Wolfe Rolex April 3 to May 21.
 Observed bred April 3 to Rolex

- Brynlee is a fancy made, smooth polled Synergy daughter with full goggles and lipstick markings
- She will be a moderate framed cow that will work well with a wide variety of bulls, power or moderated style bulls should be a successful cross here.
- We can't say enough good things about the Synergy daughters; they just flat out produce. Ask anyone who owns one and they will be quick to tell you the same.
- Brynlee would be a granddaughter of the BEE Diamond 17H cow just the same as Skywest Pol Lyla 518N which is also in this sale.

Exposed to Skywest Herzog March 18 to April 3 and
Wolfe Rolex April 3 to May 21.
Observed bred May 10

100 lbs	840 lbs	2.5	5.9	72.5	100.6	36.9	1.9	73.2	

- Heavily muscled polled daughter of Synergy that has been a soggy lady since birth. Which comes to no surprise when you see the size of her dam SBV Kalhua 240E. She's built like a freight train and passes it right onto her offspring.
- SBV Kalhua is also the dam of Skywest Rampage who was the first Rumble bull to sell and high seller of the sale. Rampage walks the pastures of Polar Farms, Dawson Creek, BC and has done an incredible job for Joe and Lindsay Loomis in which they will have a couple Rampage daughters on offer in this very sale this year.
- Rhonda has incredible bone structure, big footed with a little extra chrome that will make her a front pasture female for years to come.

Exposed Skywest Herzog March 18 to April 3 and
Wolfe Rolex April 3 to May 21.

88 lbs	805 lbs	10.7	2.1	59.2	80.0	35.0	5.0	64.6

- Here is a flashy dark pigmented Milsap daughter that will be sure to catch attention on sale day. Her heavy haircoat with a deep mid-section and nice dark feet make her very attractive amongst her pen mates.
- It is no secret what Milsap has done for our program with producing very desirable male and females that work in any herd. The females are in production now and proving to be even better than anticipated. Nice tidy udders with small teats and lots of milk. We do have a tough time selling these Milsap daughters so don't wait to acquire them because we would rather keep every single one of them.
- When we acquired the Virginia ranch cow herd, one of the benefits is the royalty of genetics behind every cow that Harry and Michelle purposely bred for. When you look back on Gillian's family tree you will see French Attack, FGAF Precious Thing, Prostock Kim, Radison, Marquee, DBD Thunder. The list goes on.

Exposed to Crossroads Titan March 18 to April 8.

- Tons of potential here with Gwen for a lot of reasons as this heifer is a tough one to let go being a Milsap daughter out of a great Duramax cow. Duramax was the bull that started it all for us here at Skywest so to have a heifer selling with him and Milsap being her genetic makeup. You can't go wrong.
- Gwen has maternal sisters working at Sinister Simmentals and Polar Farms as well as a brother "Warsmoke" working in Tanner's herd at Madge Simmentals.
- Full wrap around goggles, deep ribbed and setting up a great udder.

- A polled Milsap daughter out of a young Marquee cow that's climbing the ranks in the herd by producing heifers like "Jocelyn."
- Maternal sister was one of our high selling heifers last fall going to Double RN Ranching of Lloydminster.
- Quiet disposition, wide topped, easy fleshing and dark liver red to her feet with full wrap around goggles
- Excellent bone structure and setting up a nice udder that will last for years..

- Ms Beat is an interesting heifer that could be a sleeper in the sale with possibly the highest ceiling of any heifer in the sale. She's easy going, quiet and structurally correct.
- Her dam is a young Anchor T Legend daughter that we had purchased from Mark Land & Cattle and has done exceptionally well for us. She has produced daughters now working at Corley Land & Cattle in Tennessee and Kuntz Simmentals in North Battleford, SK. She's a big powerful dark pigmented brood cow which we feel Ms Beat 562N will follow in her footsteps.
- The guess work is done here and let this female push your program ahead.

- This big broody female is a hard one to part with due to her sheer volume, heavy bone structure and dark red pigmentation. Edith 505N has potential donor cow written all over her and we are excited to see what she does in the near future.
- Her dam is a powerful older cow that Harry had purchased from Brian Miller and Okofleck Simmentals a few years ago as a bred heifer from the Southern Round Up Sale. Since then she has put a herd bull in Langer Fleckvieh's herd and two daughters now working at Madge Simmentals. If you get a chance, ask Tanner how those females can produce as they weaned his heaviest heifer calf and bull calf this year.
- When having these sales, we understand that you must sell the good ones as well and here is a sale feature, we are proud to have the SW prefix on. She should have a lot of friends on sale day.

- Gena comes from the cow family of Anchor D Delilah 485D who we had purchased from the Anchor D program as a bred heifer and what a great producer she has turned out to be. She produced Skywest Fonzie who is now working for Stanley Martin in Iowa as well as raised up Skywest Gena 135G who we have in herd. We retained Gena 135G first two daughters so we thought it might be time to finally let one go of the Anchor D 485G bloodline.
- Consistency and predictability are what this cow family is best described as and this big dark red, broody female will follow in the same footsteps. Whether it is a bull calf or heifer calf, they are some of the thickest calves come weaning time and Gena 542N will continue that tradition on for her new owner.
- Quiet disposition, good footed and excellent bone structure put heifers like this in production for many years

- Another cowy looking female in the making off of Landmark. SBV Landmark 548J was the high selling lead off bull the year he sold that we had purchased with 619 Land & Cattle. We were looking for a bull that would add dark pigmentation as well as heavy muscle with excellent disposition. Well Landmark did just that.
- With some of these landmark females in production here at skywest, they are proving to be great mothers that wean off some of the heaviest calves each fall consistently.
- Suzzie 559N dam was purchased from Double Bar D Farms as a bred heifer and is a direct daughter of the great Romano bull. For those that have been around the Fleckvieh breed for several years. You will know that Romano is one of the bulls that put the breed on the map.

- Here is a larger framed Titan heifer off a first calf heifer believe it or not. Her dam we purchased as an open heifer from Mountain Ash Simmentals in the Fleckvieh Equation sale and she has produced 2 calves for us so far. Both making the replacement pens.
- Her dam has the genetic makeup we were looking for in Romano and Anchor T Barbi which isn't very easy to find. Older genetics that work just as good today.
- 530N has the bone structure, big hipped and wide top which should translate into a very useful cow for many years.

Exposed to Skywest Herzog March 18 to April 3 and Wolfe Rolex April 3 to May 21.
Observed bred April 18

Wolfe Rolex FF 428L - Service Sire to Lots 5, 6, 11, 23 and 31

Welcome from Beechinor Bros. Simmentals

Michelle, Kyler, Austin, Easton, Kaidynce and I would like to welcome you to the 13 th Annual Western Harvest Bred Heifer Sale. The last year has seen some challenges but overall, what a wonderful time to be apart of agriculture. Kyler is in his second year at Lakeland College and if you haven't already heard will now run under his own name KB Cattle Co. Easton is in Grade 12 and has taken a liking to construction work this past summer and has been a huge help around the farm this fall. Austin has become a very reliable, all-encompassing helper and tells me he needs to go to school more often as I tend to ask him to stay home and help..... Kaidynce is becoming a real cowgirl! She has fully trained her own colt from scratch and has just purchased a second filly to do it all over again!

Here at Beechinor Bros Simmentals our goal is to produce a female that will be productive while maintaining a strong udder, correct structure and calm temperament. The heifers on offer are out of a full health program and were given Express FP 10 along with Covexin Plus prior to breeding. By sale day they will be fully covered with Scour Bos and will have had both rounds.

The heifers came home off pasture at the end of September and have been on a TMR. We strive to be sure that these heifers are not over conditioned as we believe this harms their future production abilities.

We are excited to work with the Atlas Team and well as the rest of the great people that make up the Western Harvest group of consignors. From the guys at the sale to the gals in the office we know that they are professionally looking after all the fine details and making sure I'm on track. We would also like to thank everyone that supports our program and hope that your purchases do nothing but make you profitable.

If you have any inquiries about the offering, please don't hesitate to reach out to us or the Atlas Team. We would love to answer your questions and have a visit. To everyone that has inquired or purchased animals in the past we truly appreciate your support. If you are passing by the farm or near Didsbury prior to sale day, please stop in.

Looking forward to seeing everyone,
John and Michelle Beechinor

John & Michelle Beechinor & Family

What are we thinking....? A polled Magnum daughter is headed to the bred heifer sale?

Not only have we been trying to get some additional bone into the polled females but over the years our Magnum cows have been amongst the top producing cows on the farm. Three of the nine bred heifers we are offering this year are out of Magnum daughters.... Year after year it seems as though the high selling animal at our bull sale is a grand son of Magnum. Just to list a few..... Dutton sold to Rendezvous and now calls Sunville Simmentals home, Big Turk sold to Polar Farms and you might remember a bull named Rumble.... I guess what I am trying to say is the possibilities of a big ROI are definitely here. Jaylynn is dark red, deep bodied and is setting up a great udder. All these same characteristics are also evident with her dam 159J. A cow we selected out of this very sale from Virginia Ranch.

It is your lucky day. In 2024 we sold a pick of the herd flush. Elm Tree Farms was the winning bidder and they selected 735E. Long story short we decided to flush her as well when she was there and therefore this 539N becomes available to you. 735E is no one hit wonder her sons have topped the bull sale on two different occasions. These bulls go by the names of Dutton and Big Turk. In the previous comment we talked about the impact of Magnum, well, 735E is a Magnum daughter! 539N herself is a good-natured female that has that real cow look to her. She has huge wrap around goggles and like the rest of the cow family is very easy doing. 539N is carrying a pregnancy to our new heifer bull Maverick! We are extremely happy with his first set of calves!

This has been a hard decision. I really like this female!! Dark red, long spined, black hooves, deep bodied, great temperament..... overall just very complete. If you like raising the good ones here is a heifer for you. 327F, her dam, was our pick of the Anchor D females in her respective year. She definitely has not let us down with now 3 daughters selling through this very sale going to Evening Star Simmentals, Graff Simmentals and now 527N!!

I should also mention she has had 3 sons go through the bull sale with her 4th on the way..... needless to say I am really hoping to get another daughter out of this cow this winter and I can guarantee she won't be for sale..... Carrying a pregnancy to the Homo Polled outcross FSS Polled Hendrix for a guaranteed polled calf!

If you liked the She Devil choice lot a couple years back, here is a second chance. Stefon was the winning bidder on choosing between the two Magnum x She Devil sisters..... I personally really liked them both and was happy to bring 315L back home! Wait a second, another Magnum female that has produced a top end offering..... just saying. 542N, is very similar to her mother is that she is an easy doing animal with lots of rib and shows to be dropping an impressive udder. 315L has a very nice bull calf in the bull pen this fall and is developing into a beautiful young cow. Going 2/2 to start your career is a great start for a production record! 542N is again carrying an exciting pregnancy to our polled heifer bull Maverick!

The lone Rumble female for this year!! We are very happy with our Rumble daughters and decided this was the year to keep a few for ourselves..... sorry! That being said we picked what I felt was the best one to still give you an opportunity at these great genetics. 581N's dam, 147J, was our top bred heifer for her respective year and hit the nail on the head with her first try raising a high selling son to Polar Farms who goes by the name Boa! A full sister to 147J was our high selling bred female in our 2020 Western Harvest offering selling to Virginia Ranch. This long spined, deep ribbed, broody female has all the making to be an outstanding cow!

Did you say you like them Fancy....?! Of course you do! This one is extra Fancy as she is a grand daughter to our flush cow Fancy 75E. 75E is a cow that is hard not to admire. Big bodied on a large frame and yet she still has that feminine broody cow look. Her influence on our herd is about to take off with a bred heifer in the keeper pen and a dandy polled Manfredi heifer calf at side. 569N carries on these attributes and like her dam and grand dam it appears she will have a picture-perfect udder. 569N also carries an intriguing pedigree that is different from the mainstream with Seldom and Maroon on the bottom side and Imax and Spartacus on top. Sounds like production won't be an issue! One should also note she is carrying a potentially Homo Polled pregnancy.

I remember the day we couldn't decide between the two bred heifers that Wolfe's had on offer, so the decision was made to bring them both home. Both these Geronimo cows have turned into great cows and can be bred a number of different ways with excellent results. Both females have strong udders and tremendous feet. 549N came to us with the additional chrome package and it was evident from day one that she had it. We talk of deep bodied, big barreled cattle, well that is 549N to a tee. A maternal sister sold to Wolmarans Simmentals in last years Western Harvest Sale. We were very impressed with our Steady Eddy calves and think this cross will be a great combination.

BEE Denali 29J - Maternal Brother to lot 38

If you like buying into proven cow families here she is. An easy fleshing female with heavy hair who has always been ranked high throughout her development. Maternal sisters have been extremely productive. We have 571C's first daughter who has raised a couple Western Harvest sale features selling to Westgold and Johnson Ranching. Another maternal sister was a feature in our 2022 sale going to Crossroads where she has entered their donor pen.

Now add a shot of maternal strength of Malone to all that and the potential could be endless. One should note that 571C is working on putting a third son through the bull sale!

A polled daughter out of Electric Avenue and a Wow Effect cow we selected from Applecross as their top heifer in her respective year. This long spined feminine female shows to be setting up a strong udder with ideal teat size. 7F, 503N's dam, is a big bodied cow with ample milk. We have a maternal sister to 503N working in our herd and this summer I was lucky enough to see a maternal brother and WOW..... needless to say I am hoping to bring him back home in the next couple years to run in our commercial herd!! 503N is carry a cool pregnancy to BEE Intrepid who has been doing great things over at Anchor D.

Welcome from Virginia Ranch

Virginia Ranch [Harry & Michelle; Brandon, Dani, Ryerson & Hayeson; Allison & Spencer] welcome you to the 2026 Edition of the Annual Western Harvest Sale – second year sale at the Skywest Simmentals Sale Facility (Didsbury, AB). As we slow down as active breeders we are thankful that the Western Harvest crew still wants us to participate in this annual Production sale. Although our offering is shrinking each year, we are still proud of the gals we do have on offer. We are forever grateful to the Edwards family for purchasing (100 cows) our lifework of females a few years ago – they have become second family to us over the years. Thanks and continued friendship to our other Co-consignors this year Beechinor Bros. Simmentals [John & Michelle Beechinor], Langer Fleckvieh [Pam & Lyle Langer], Polar Farms [Joe & Lindsay Loomis], Madge Simmentals [Tanner Madge & Colin Green] and Cow Boss Simmentals [Levi Marcinek]. We extend a warm welcome to Levi an astute conscientious breeder who Harry feels has an “awesome eye for cattle” and he doesn't say this lightly. We believe we have offered a tremendous group of females that are full of potential for the Simmental Seedstock industry.

We would like to take this print opportunity to acknowledge and extend heartfelt gratitude to Transcon Livestock for their decades of marketing our Virginia Ranch program. We are so very grateful to Jay Good, Terry Stewart, Rodney James, Bob Wilson and Bob & Heather James and all those that are not mentioned but were components of the Transcon Team over the years.

We hope you can join us on sale day; however if you can't join us in person – please reach out to any Atlas Marketing team member who can be your eyes of assessment. If you have shown an interest in our consignments via phone calls, private farm tours or have taken time to view our consignment videos – we sincerely appreciate each of these gestures. We have been breeders for over 40 years and are proud of the animals we have raised that have gone on to produce for our fellow cattle enthusiasts. It warms our heart to look at many pedigrees and see the contribution Virginia animals have made on the Simmental business. We always strive to raise functional females with sound udders that are correctly built. We have a full herd health managed program. Before breeding these heifers received their modified-live vaccine of Bovishield Gold FP5, Covexin Plus. As newborns they received our new calf protocol treatments, then Bovishield Gold One Shot (twice/boosted). This fall they have received Ivomec pour on when they went through the chute during clipping. We pictured our offering on September 9th after they came straight off of summer pasture; so the pictures you are viewing here are the heifers in their working clothes without any extra feed in them.

All heifers will have videos available to view prior to sale day. They can be found on the Atlas website. If you should have any inquiries on our consignments we hope you will reach out to us, as always we will make the time prior to sale day for you to view personally any of our consignments.

Sincerely,
The Satchwell's

Welcome to the 13th Annual Western Harvest Simmental Female Sale. This year the Harvest group has left our sale in the very capable hands of Cody Coupland and the Atlas Livestock Marketing team, we are very excited that you will be continuing to work with us now and into the future. We would also like to welcome our newest consignor Cow Boss Simmentals, a wonderful addition to our group.

This year we are bringing four sound females out of some quality cows and Keet's Lazer, a homo polled, dark cherry red Bull with incredible feet and temperament. They are all AI'd to proven and sought after calving ease sires and have never been exposed to a bull. All heifers are on full herd health and will have their first scour guard shot as well.

Hope to see you all at Skywest Simmentals sale day.

Lyle & Pam

Jolene is a very well put together heifer going back to the Willow Jade cow family. Her mother is a beautiful Nolan daughter who is now on the backside of middle age, but you would never guess it. Jolene is dark cherry red, developing a nice udder and has good feet, a trait Lazer seems to always bring to the table. Bred up early to Anchor D Imax. Lots to look forward to here.

Bred March 27 Anchor D Imax. Due Jan 6.
NO EXPOSURE.

**100% FULL FLECKVIEH. HOMO POLLED.
DILUTER-FREE**

Pol Nadya's mother now has the distinction of being the oldest cow on the place. Ellie is still quite sound but walking a little slower these days. This heifer should be staying at home. Fortunately, she has another heifer on her this year that I will definitely be putting a lock and chain on. Pol Nadya's sire, Lazer, and Ellie both provided the polled factor, the dark cherry red pigmentation, great feet and the sweetest disposition, the longevity is also built-in. She has the potential to be a superstar in your herd and we predict her Polled Radium calf will be stunning.

We have a few Eveready daughters in our program and we are very happy with the job they have been doing. Canterra's genetic makeup is a little different than most, but at the same time well proven. The good mix of caving ease and performance will provide lots of breeding options moving forward. Canterra is long, smooth made and her udder is developing nicely, really good to work with, she will also knock the horns off every calf. Pol Canterra would make a great addition to your herd.

Welcome from Polar Farms

Welcome to the 13th Annual Western Harvest Simmental Female Sale!

On behalf of everyone at Polar Farms, we would like to welcome you to the 13th Annual Western Harvest Simmental Female Sale. We are excited to once again be part of this great event and are proud to offer a strong group of bred heifers that we believe represent the quality and direction of our breeding program. We are a family-owned Simmental operation located just outside of Dawson Creek, British Columbia. At Polar Farms, we raise Red, Black, and Fullblood Simmental cattle. We take great pride in producing quality cattle with sound structure, good dispositions, and strong genetics that will go out and work for their new owners.

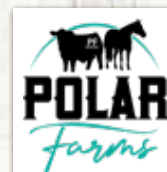

This year's offering is especially exciting for us, as these will be the first females to sell out of our walking herd sires, SKYWEST Rampage 240L and BEE Big Turk 735L. Both bulls were high sellers at their respective breeders' bull sales, and we couldn't be more pleased with what they have brought to our program. We are extremely proud of these bulls and the quality of calves they have produced. We believe these females are a great representation of their sires and are excited to see what they will go on to accomplish in their new herds. All of the heifers in this year's offering are bred to JNR Hefner, whose first calf crop has just reached the weaning pen. His calves have been very impressive, showing plenty of expression, quality, and eye appeal. We are extremely excited about the potential of these matings and believe they will make a great addition to any operation.

We would also like to take this opportunity to sincerely thank everyone who supported us at last year's Western Harvest Sale. It was an outstanding sale for our operation, and we are truly grateful to all the buyers, bidders, and everyone who showed interest in our cattle. The continued support and confidence in our breeding program mean a great deal to our family and encourage us to keep improving our herd year after year.

At Polar Farms, we are always looking to move our program forward by investing in the best genetics we can acquire. We believe that a strong cow herd is the foundation of any successful cattle operation, and we are committed to raising females that will be productive, dependable, and profitable for years to come.

We would also like to invite everyone to join us for the first annual Northern Force Bull Sale on March 7th, where we look forward to offering another great set of bulls. Thank you to the sale organizers, fellow consignors, and everyone who helps make the Western Harvest Simmental Female Sale possible. We wish everyone a successful sale and look forward to visiting with both familiar faces and new customers on sale day!

Sincerely,
Joe & Lindsay

This polled heifer caused some excitement when she was born, her mother and the rest of the Kuntz Duramax 12D daughters have out done themselves in our program, and this being the first cross with our walking herd sire SkyWest Rampage 240L.

We really didn't want to let her go but we know she will do a great job promoting our genetics for her future owner.

Miss Duramax has big potential, she is large framed, deep middled and sure to make an impact in any program she enters, her mother and grandmother both knocked it out the park with bull calves this year, watch for them in the top of this years bull sale.

Bred to JNR Hefner – JNR 493M Exposed March 19, 2026 to May 28, 2026.
Vets opinion confirmed by ultrasound for Jan 20, 2027

Nova is another SkyWest Rampage 240L daughter crossed with SkyWest Katie who comes from a very powerful cow family who her grand dam is our Quebec cow Miss BBBG Adria 103D. Last year she had a daughter in the Western Harvest Sale (PF Maggy 409M) that sold for \$28,000 to Beechinor Bros. Simmentals.

This heifer is sure to make a mark in her next herd with her excellent disposition, great feet and carrying on the trait of great udder development like her dam. There will be some keeper heifers come out of this female in her near future.

Nessa is another Big Turk daughter with big potential, she is long bodied and big middled with lots of hip. Her dam is much the same with a nice udder and feet that are maintenance free.

We decided to put her in this years Western Harvest sale only because we have her dam and a sister that are working great for us and thought it would be a great opportunity to get some Big Turk genetics out and available at the Harvest Sale.

This heifer will be an easy doing female that has longevity built into her dna which will prove to be a quick ROI for the new owners.

Bred to JNR Hefner – JNR 493M Exposed March 19, 2026 to May 28, 2026.
 Vets opinion confirmed by ultrasound for Jan 20, 2027

Welcome from Madge Simmentals

Welcome to the 13th Annual Western Harvest Female Sale!

2026 marks our third year being part of this wonderful sale, filled with quality cattle and even better people! Selling alongside Skywest Simmentals, Virginia Ranch, Langer Fleckvieh Simmentals, Beechinor Bros Simmentals, Polar Farms and Cow Boss Simmentals is truly an honour. It's a great group of breeders who all bring something a little different to the table, and we're very proud to have Madge Simmentals represented alongside them once again.

I'd like to invite everyone to join us on sale day for a wonderful meal, great visits and the opportunity to look through some truly outstanding cattle brought to town by this amazing group of Western Harvest consignors. One of the best parts of this sale is getting everyone together, catching up with old friends and meeting some new ones along the way. If you can't attend on sale day, please don't hesitate to contact sales management or any member of the Western Harvest crew. We'd be more than happy to visit about the offering and help in any way we can.

We dug down deep this year to bring what we feel is a strong representation of our program. Representing Madge Simmentals this year are five bred heifers that we'd love to retain, but we're even more excited to offer to the industry. It's never easy letting females like these leave the program, but we believe a sale like Western Harvest deserves cattle that we're proud to put our name behind. These five females come from three different sire groups, giving a good cross-section of the genetics we're currently working with and the direction we're heading with our cow herd. As always, our goal is to produce functional, productive females that can go out and work for their new owners for years to come.

The heifers were exposed to two of our calving-ease heifer bulls, Elm Tree Knox 73K and BEE Leonardo 206M, for December/January calving. We exposed our heifers earlier this year with the goal of having the majority calved out before the cow herd gets underway in January. This is a first for us, but we think it should work really well. Having those first-calf heifers calved, settled in and going before the main group starts should make things a little easier when January gets busy around here!

A huge thank you to Skywest Simmentals, Riley and Cody Edwards, for opening up their farm as the new home of the Western Harvest Sale. The sale barn and pens they built made an already great sale day that much better. There's a tremendous amount of work that goes into hosting an event like this, and we truly appreciate everything they and their crew do to make Western Harvest such an enjoyable sale to be part of.

Lastly, thank you to everyone who has supported Madge Simmentals and the Western Harvest Female Sale over the years. Whether you've purchased cattle, bid, stopped by for a visit, called to talk cattle or simply followed along with our program, we sincerely appreciate it. The cattle business is built around great cattle, but even more importantly, it's built around great people, and we're fortunate to have met so many through events like this.

We can't wait to visit with you in the weeks leading up to the sale and, hopefully, see you there on sale day! Thank you, and we'll see you at Western Harvest

Thank you, and we'll see you at Western Harvest!

FULL FLECKVIEH

When we purchased Jeff Bruketa's portion of the JB cow herd in 2023, we knew there would be a lot of exciting years ahead creating more wonderful females from the strategically made cow families curated by Jason. Dixie Chick is the very first daughter to sell from one of those cows.

101N is the youngest heifer in our offering, and quite possibly the best. Cherry red, polled, deep bodied and one that screams to me that she could be donor material one day. Her dam and granddam have both made their mark in our cow herd, with both raising replacement-quality females again this year.

Bred to BEE Leonardo 206M, Bred first cycle - (Exposed March 6/2026 - June 6/2026)

You know what hurts more than selling one Cannon daughter... selling two!

Sale heifer season always brings excitement mixed with a little sadness, especially when you're picking the best of the best to represent your program. 4N is exactly that, one of the very best from our 2025 calf crop.

Quite possibly the last daughter out of the old VIRS 706E, we feel Cannon complemented her extremely well. 4N is deep made, easy fleshing and backed by a productive, profitable cow family. A maternal sister is working for Stout Brothers, purchased through Western Harvest in 2024.

Lone Stone Cannon 210H has done nothing but good for us, his progeny come polled, full of middle and consistently find their way into the keeper pen.

**100% FULL FLECKVIEH**

It seems to be a copy and paste with this next phrase.

You know what hurts more than selling two Cannon daughters... selling three!

In my opinion, I don't think you could ask for a better udder on a female than what 34N has. She comes from a cow family we've had great success with. Kelesha's dam raised a full sib this year that made the 2027 bull sale pen, while her granddam raised a top-end heifer calf that landed in our replacement pen this year.

Solid footed, easy doing and hard working cows, stemming from the great Anchor D Simmentals program.

Cannon, 34N's sire, has crossed exceptionally well for us, and it gives me great pleasure and excitement to see what the future holds for this exceptional female

Another daughter out of a very special female we acquired from the Bruketa family. With 50N, there's not much guesswork - her dam and granddam both put very special bull calves into our 2027 bull sale pen this fall. In fact, we like 50N's young dam so much that we flushed her this spring, hoping to expand the influence of this cow family in our herd.

Another Knox daughter out of a first calver, 50N offers something a little different than the rest. Moderate framed, tidy and cherry red - breed her for power or calving ease, and I don't think she'll disappoint.

Carrying service to BEE Leonardo, whose first calf crop certainly didn't disappoint. A large percentage of his first progeny made the bull pen, with several females retained to breed next spring. We think this mating could be an exciting one!

Last but certainly not least, 89N, another daughter out of one of our Bruketa female purchases from 2023.

We didn't hold back this year, and felt having a Virginia Skynyrd daughter as the cherry on top would finish off our consignments quite well. Rivka is the first Skynyrd daughter we've offered for sale, and her dam continues to prove herself, putting a Cannon daughter into our replacement pen again this year.

89N is dark pigmented through the face, clean uddered with dark teats, and backed by a cowfamily that continues to work for us. She moves out freely and effortlessly, while still carrying that feminine muscle expression and shape we like to see.

Welcome to Cow Boss Simmentals

It really was an exciting moment, when I was invited to be a part of this sale! But with that being said, it is also a very high bar to come into this renown sale and hold your own amongst the best of the best! I have been a supporter of this sale since 2015 when I purchased a female from my friends at Langer Fleckvieh Simmentals. I thought it was kind of neat, when I realized that ¾ of my offered heifers here today were daughters of females I have purchased through this very sale. From three of the founding consignors - Langers, Virginia Ranch and Beechinor Bros. I would like to thank my fellow consignors as well as the Atlas Livestock Marketing group for the opportunity to be included in the Western Harvest! I have been approached about the prospect of selling females many times over the years. One of the major reasons it has been such a long time coming, is because the heifers are what fuels this guys fire! It is the females that are the ones that get to stick around the ranch for their lifetime. For me to be around, deal with, admire and work alongside everyday. It is neat to watch the influence that the bull calves you produce and sell, have on fellow operations. But these bull calves come and go. Yes, we all want to raise and sell that bellringer of a bull calf. But those kinds don't just happen on their own either. It is the females that are the backbone of the operation. We need a momma cow to make and raise that next generation! That is why I get most excited when a heifer calf is born. The females are here to stay. Or at least that has been the case up until now.... Ultimately, I wanted to be represented by the Cow Boss prefix in the best way possible. Offering females that I have the utmost confidence in, that will go out and become great cows wherever they end up. I believe that time has come, and I am proud to present these 4 heifers for your consideration!

These heifers were pulled from the cowherd, clipped and pictured without anything but free choice grass all summer. They have been on a full herd health program. They will have received their first shot of Guardian, (Scour vaccine) their 8 way booster, and Dectomax prior to sale day. Also, check out my "Cow Boss Simmentals" Facebook page for some videos on these heifers from baby calves to present day footage! Please feel free to get in touch with me if you have any questions regarding my offering. I look forward to talking heifers with you on November 14th!

Sincerely,
Levi Marcinek

100% FULL FLECKVIEH.

Where to start with this heifer? 7 years ago we purchased a bull from Anchor D by the name of Eldor. He was a French Attack son of the donor dam, Anchor D Kael. To make a long story short, Eldor stifled himself before we even got to use him and he only ever bred 6 cows naturally. I got a very limited semen bank on him and have to use it very sparingly. When the opportunity to acquire some full sib embryos came along, I jumped at the chance! I got a bull calf and a heifer calf. Fortunately for me the bull calf turned out exceptionally well, and has since filled the shoes of his big brother Eldor and is my main walking herdsire now. (His name is Cow Boss Nashville) Not only did the bull calf turn out exceptionally well, so did this heifer. She has so much capacity and even as a heifer calf had that "big barrel." She is feminine, setting up a flawless udder and will mature to be a cow that you will be proud to showcase. The Skeels announced in their Pasture Treasures catalog this fall, that they had the misfortune of a semen tank going dry and losing some inventory on the French Attack semen. Also now the fact that Mr. French Attack has moved onto greener pastures, acquiring a direct daughter will become more and more, seldom. F.A impacted the breed as much as any bull ever IMO, so no guess work here. Kaela has had a naturally docile disposition from the get go and is a real sweetheart. Being my best friend, it makes it extra tough to give her up! I will be sure to come visit her, wherever she ends up!

**100% FULL FLECKVIEH**

Rosa is a heifer that I was pumped about as soon as I peeped my head in the barn door and saw what momma Rose had just given me! Virginia Rose 700E has been a fantastic cow who not only has given me a registerable calf every year, but one year even put twin bulls in the bull sale! Then if you read my previous heifers footnote, you will have got the low down on Rosa's sire, Eldor. I didn't get very many calves from the Eldor bull, but the few I did were all at the front of the pack! With only a few straws in the tank, only my very favorite cows are mated to him. So it is very hard for me to offer a daughter of this bull, as well as a daughter of this cow. Rosa herself has a beautiful skull structure for a horned heifer. Four black hooves, feminine design, yet real natural fleshing ability right from a young age. You could set a platter on her back, and she could stroll across the pasture and it would just sit there. Her udder will be guaranteed to hold up for her lifetime and then some! Rosa is just a replica of her dam and I have no doubt that she will be a producer but also look good while doing it!

Maternal Brother to Lot 62

FULL FLECKVIEH

Nancy is a moderate, deep, soggy and thick female. Her mother has also been a fantastic producer for me! BEE Elara's first bull calf was sold in the bull sale, and then her second calf - who was a full sib to this heifer, was the pen leader in performance and a great calf who unfortunately didn't make the bull sale catalog due to injury. If you scroll back on my Cow Boss Simmentals facebook page, he was pictured with his dam, fall of 2024. Elara has raised the pen leader in performance once again this year with a Black Gold Crude bull calf. A great track record on the BEE Elara cow and I think throwing Silver Lake Johnny Cash into the mix in the pedigree of this heifer, only sweetens the pot! Johnny Cash is a bull that my dad walks in the commercial herd and I was fortunate enough to sneak some cows in with him at breeding time. The Johnny Cash offspring are very easy fleshing and his calves rise to the top of the pen with ease. My lead off bull this past spring was a Johnny son, selling to the great folks at Sweet Creek Ranch! Nancy is going to be a sound and productive little cow. Note her early service with the potential for a calf over the holidays. **SIRE VERIFIED AND DILUTER FREE**

Norah could be the first one to catch your attention because of her colour pattern. Or she could be overlooked because of that colour pattern. But if you look what is underneath that hair and hide, you will see characteristics of a BEEF cow! This is just a big time performance heifer who also has a very sweet personality. Again, backed by a highly productive dam, this heifer will raise some bulls in her day! Her mother LFS Echo will take the cake for the largest volume cow on the whole farm. Norah is on track to follow her up! A heifer that I won't lie, I was disappointed in when she was born (Cause of her colouring). But every day since she has proven me of her worth and has earned her spot in my top 4. Note* She is bred to a proven heifer bull of my best buddies, who is dark red and goggled going back to the NAC Battle Cry 4F bull.

BEE War Paint - Service Sire to Lot 64

Terms and Conditions

TERMS - The terms of the sale are cash, cheque, e-transfer, or wire and are due at the time of sale, unless other arrangements have been made between buyer and seller prior to the sale. Atlas Livestock Marketing reserves the right to charge interest at a rate of 2% per month on overdue accounts. The right of property shall not pass until after settlement is made. Atlas Livestock Marketing reserves the right to require a certified cheque as settlement before releasing any sale cattle. Should any purchaser fail to settle for their purchase Atlas Livestock Marketing reserves full power to resell the animal to the best advantage either publicly or privately, without further notice. Any loss arising from such resale together with keep and all other expenses shall be payable by the defaulter. All settlements must be made with the clerks of the sale before any cattle will be released. Atlas Livestock Marketing and/or the Auctioneer shall have the right to refuse bids from anyone who has a previous record of default in payment or who has not made proper credit clearance prior to the sale with the owner or Sale Managers.

BID - No private sales will be allowed except as otherwise provided for in the terms and conditions. No by-bidding will be permitted.

SALES TAXES - Applicable sales taxes will be charged on semen, embryos, and trucking fees (if listed), respective to the home province of the buyer, not the seller.

DISPUTES - In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK - Each animal becomes the risk of the purchaser as soon as sold. Animals will be cared for at the purchaser's risk for a reasonable length of time.

INSURANCE - Each animal becomes the risk of the purchaser at the time of sale and should be insured. Animals returning to the seller's farm must be insured.

US BUYERS - There is an additional charge (approximately \$300.00 US dollars) that will be applied to each animal purchased. This covers documentation, vet inspections/testing required to export. This cost does not include transportation or brokerage which is the responsibility of the buyer.

CATTLE PICTURES AND INFORMATION PROVIDED - The images in this catalogue are believed to be accurate representations of the individual animals and the information contained in this catalogue is provided by the seller and believed to be true and accurate. Atlas Livestock Marketing, and catalogue designers/producers assume no responsibility if the images and/or information as received have been altered or is inaccurate.

ANNOUNCEMENTS - All announcements from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

CERTIFICATE OF REGISTRY - A registration/recording certificate issued by the applicable breed association and duly transferred will be furnished to the buyer of each animal after settlement has been made. It is the responsibility of the buyer to determine the acceptance of this certificate in any other association.

SHIPPING - Assistance will be given in making shipment after the sale but no risk is assumed by the Sales Management or Seller. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instructions when making settlement.

BREEDERS GUARANTEE - As per applicable Canadian Breed Association Breeding Guarantee guidelines. Copies are available at the sale settlement desk to be picked up by the buyer at any time. In no event shall the seller be responsible for reimbursing more than the purchase price.

EXCEPTION TO GUARANTEE - In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

HEALTH - It is the buyer's responsibility to determine health requirements for importing any animal into his province or state. Atlas Livestock Marketing assumes no responsibility for the health status of any animal in the sale.

EMBRYO & SEMEN - Full settlement must be made before release is done and shipping arrangements should be done within 30 days of the sale unless arrangements made between buyer and seller prior to the sale. Shipping arrangements and costs are the expense of the purchaser once release has been given.

ACCIDENTS - Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, auctioneer, consignors, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

RIGHTS AND OBLIGATIONS - The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

Atlas Livestock Marketing. IS AGENT ONLY - It is to be clearly understood that Atlas Livestock Marketing is only acting as a medium between buyer and seller and is not in any way responsible for any failure on the part of either party to live up to his obligations. Neither does Atlas Livestock Marketing assume any financial obligations to collect or enforce collection of any monies between parties. Any legal action that may be taken, in exceptional cases, must be between buyer and seller.
